Journal: Behavioral Ecology and Sociobiology
Manuscript: Consistency in social network position over changing environments in a seasonally breeding primate
Author: Maryjka B. Blaszczyk
E-mail:maryjkabk@gmail.com

Datasets used in all analyses reported in manuscript:

1. GroomDyads_S1.xlsx
2. GroomDyads_S2.xlsx
3. GroomDyads_S3.xlsx

These files are directed edgelist for each of the three social networks constructed. S1 = Season 1, S2 = Season 2, S3 = Season 3.

#Variable key:

Actor	actor in grooming interactions
Recip	recipient of grooming
total.groom.secs	total seconds of grooming given by actor to recipient over data-period
Actor.mins	focal observation minutes recorded for actor
Recip.mins	focal observation minutes recorded for recipient
dyad.obs.secs	sum of actor and recipient focal minutes, converted to seconds
groom.rate	total.groom.secs/dyad.obs.secs

4. IDs_Sex_EloScores.xlsx

Sex and Elo-rating attribute information for all individuals present in the study group from June – December 2012 (N = 29). Note that only 26 individuals present from March – Dec were included in social network analyses

#Variable key:

ID	individual identity
Sex	individual's sex
EloMay	Elo-rating on the last day of Season 1 (31 May 2012)
EloSep 2012)	Elo-rating on the last day of Season 2 (30 September 2012)
EloDec 2012)	Elo-rating on the last day of Season 3 (10 December 2012)
